PROFILE

My fuel is curiosity, for me it is common to let creativity take over and allow me to create new things. My area of expertise is software development, where since 2015 I have focused my studies on the area of mobile development.

In addition to software development, I am also interested in other areas such as personal development, public speaking, project management and entrepreneurship. Areas where I have had brief experience in the past.

As for my personality, I am a naturally observant, sincere person and I find it easy to learn new things.

Furthermore, I have been involved in some projects where I had the opportunity to work with people from different areas of knowledge. These opportunities allowed me to learn how to work better in a team, study and practice my public speaking skills and deal with decision-making.

EXPERIENCES

(2023) Project Coordinator

Center for Studies in Entrepreneurship

- I participated in decision-making
- I developed and delivered training
- I coordinated a team of six people on internal and external projects
